Launch Nearpod--

HOW TO LAUNCH A NEARPOD LESSON
Slides 3-16 are the actual slides created in Google Slides for our training. These slides were to demonstrate some of the basic things you can use to keep students engaged.
Welcome to Nearpod and Flocabulary!

By Publisher
Open Ended Question

Have you ever used Nearpod?
If so, do you know how to edit a Nearpod you find in the Library?
Have you ever created your own?

How to Edit
Click **Edit This Slide** in the plugin to make changes.
Don’t have the Nearpod add-on? Open the “Add-ons” menu in Google Slides to install.
How to Edit
Click the Edit This Slide button in the plugin to make changes.
Don’t have the Nearpod add-on? Open the “Add-ons” menu in Google Slides to install.
How to Edit

Click **Edit This Slide** in the plugin to make changes.

Don’t have the Nearpod add-on? Open the “Add-ons” menu in Google Slides to install.
The next slide will take you out to Nearpod’s Help Center. You can find a web resources you want students to read/explore and add the link directly in your nearpod.

How can we help you?

- Getting Started
- Creating A Lesson
- Sharing Nearpod (With Students & Colleagues)
- Nearpod For Admins
- Student Activities & Reporting
- Using The Nearpod Store
- Nearpod Programs
- Payment & Pricing
- Nearpod Resources & Training
How can we help you?

How to Edit
Click Edit This Slide in the plugin to make changes.
Don’t have the Nearpod add-on? Open the “Add-ons” menu in Google Slides to install.
How to Edit

Click [Edit This Slide] in the plugin to make changes.

Don’t have the Nearpod add-on? Open the “Add-ons” menu in Google Slides to install.
There is a simple Quiz feature, if you do not think Time to Climb is for your students. Here is a screenshot of ALL the different features you can add to a Nearpod.

- Use with any tech
  Use with any device, including smartphones, and any internet connection, even cellular.

- Launch live lessons
  Use with any conferencing solution. Sync and control students’ screens.

- Assign self-paced lessons
  Assign self-paced lessons or homework. Receive detailed reports to monitor student progress.

- Track and analyze performance
  Get real-time input during live lessons and receive post-session reports.

- Access thousands of interactive lessons
  Choose from 7,500+ editable, premade lessons or upload your own Google slides, PowerPoints or PDFs.

- Collaborate and share lessons
  Organize and share lessons through Nearpod’s school and district libraries or through your LMS (e.g., Google)

How to Edit

Click [Edit This Slide] in the plugin to make changes.

Don’t have the Nearpod add-on? Open the “Add-ons” menu in Google Slides to install.

D. 4
E. 5

How to Edit
Click [Edit This Slide] in the plugin to make changes.
Don’t have the Nearpod add-on? Open the “Add-ons” menu in Google Slides to install.
Welcome to Nearpod in Google Slides

Note: Nearpod slides cannot be copied & pasted

Here’s how it works...

1. Open/Install the Nearpod Add-On
2. Add Nearpod Features
3. Save & Go To Nearpod
Login through Classlink
When Nearpod opens, it may go to My Library instead of the Nearpod library. Notice there is a District Library there too. If you find a great one, or create a great one, send it to us. We will put it in the district library.

Change it to the Nearpod Library. Let’s explore.

Take 5 minutes to search. Find a lesson we can edit.
Let’s Edit

Once you have chosen a lesson,

Step 1: Click Add to my library

Step 2: Click Show in my library

Step 3: You can choose either of the options on the next screen.

Step 4: Now it’s time to edit. You can now delete and add. Let’s explore with that part. I am here to answer your questions.

Step 5: Be sure to save when you are done.
Adding Slides

Once you click on add a slide, you have two tabs. **Content and Activities**

Be sure to check out both.

- **Timer** -- good for building test skills
- **Media** - good for adding images or maps
- **Recordings** - Student communication is key

Some activities have additional features.

If you add a slide, it automatically goes to the end. You can click, hold and drag it to the place you want it.
To Launch a Lesson

Step 1: Hover your mouse over the lesson in your library.

Step 2: Choose Live Lesson or Student Paced Lesson.

Step 3: Either Choice will give you a screen with the code and the link to share in Google Classroom.

Step 4: Give your kids the code and you are ready!!!!
During a Lesson

- You can watch the little people in the lower corner. It tells you how many are participating. If someone leaves for a period of time, the people will turn from green to red.
- If you have embedded a video, choosing on your device only is the best option. Keeps bandwidth issues from occurring.
- No need to show your screen whole group (unless a video). You can keep a better watch on results from quizzes, etc if you are seeing the results of the student work.

- Don’t forget about the share button if you have a really good student submission.
- There is a student view icon in the top right hand corner to change to their view. There is also a hide student names if you are showing whole group.
Ending a Lesson Early

If you get to the end of the period and you are not done with your Nearpod lesson:

1. Hit the white arrow at the top left of the screen.
2. Another screen will pop up and you will choose Yes.
3. The next day, to resume (right where you left off), Choose Live Lesson and you will see this screen.

4. Select the period (by the time of day) and choose Resume. This will take you right back where you left off AND continue with the same report from yesterday.
5. If you launch a new live lesson, you will need to fast forward to where you left off and it will create a separate report for you.
At the end of the day, your formative assessment reports are ready for you.
Creating a Nearpod!!!!!!!

You can create a Nearpod in Nearpod…. But the easiest way is through Google Sheets.

Nearpod Exclusives

Integrating Nearpod with Google Slides

August 2, 2019 / The Nearpod Team

The deepest integration of your favorite classroom tools to spark engagement has arrived! With this game-changing update, you can now integrate Nearpod activities & content directly within Google slides with the free Nearpod add-on!

It can be a struggle to juggle different apps, tabs & resources to curate the perfect lesson for your students. We’re eliminating multi-tab teaching by allowing you to have everything in one place.
1. Click the + sign in the right hand corner.
2. Choose Lesson in google Slides
3. Accept the Google permissions (*from here you will be redirected to Google Slides*)
4. Click Add-ons
5. Click Get Add-ons
6. Search for Nearpod
7. Download the Nearpod Add-on to your Google Slides
8. Click Add-ons again
9. Click Nearpod, Open Nearpod
10. You will now see the Nearpod window.

Once you do the Add-ons steps (4-6) you will not have to do those again. However, each time you use Slides to create a Nearpod, you will need to click on Add-ons and choose Nearpod each time. Otherwise Google is only creating Slides.
Now you create your slide, and add in Nearpod activities as you want to. Once you are done, be sure to click on Save and go to Nearpod.

Here is a link to Nearpods instructions. This will take you step by step through the whole process.
Thank you for joining us today. If you have questions, please feel free to reach out to any of us. Our job is to help you!
